

Planetary Design French Press Range

Planetary Design began out of one man's desire to be able to brew the perfect cup of coffee whilst he was backpacking through the wilderness. After many adventures with burnt coffee, instant coffee, or no coffee, the first design of the Planetary Design was born: the Travel French Press. Since then, Planetary Design has added other clever coffee and tea products to their range, including an array of French press products.

The Steel Toe Travel Press and the Double Shot Press allow you to brew your coffee and drink from the same vessel, without decanting into another cup. The more traditional Table Top Press allows you to pour your brew into your favourite cup to enjoy. Each design has been crafted using double-walled, insulated stainless steel to keep your brew warm for hours!

SKU: ST1520 SKU: ST0720

Table Top Press

- Double-walled stainless steel
- Functional design and comfortable handle
- Size: 20oz, 32oz, 48oz
- Colours: Silver, Black, Blue, Mocha, and Orange

Featuring Patented Brü-Stop Technology

The Steel Toe Travel Press, the Double Shot Press, and the Table Top French Press all feature Planetary Design's patented Brü-Stop technology. The Brü-Stop is designed to create a physical barrier between the grounds and the brewed coffee, once it is fully pressed down. This stops the brewing process, preventing over-extracted and bitter coffee!

Traditional French Press screen allows continual contact with coffee grounds

Brü-Stop plate prevents bitterness & over-extraction once fully pressed down

Ultra-fine mesh screen under Brü-Stop plate

No more separated "teeth" that can break over time

Precisely fitted outer gasket allows for smooth pressing, and keeps grounds out of your cup

FEATURES
