

Varia Multi Brewer: Six Brew Methods in One

The Varia Multi Brewer is a six-in-one brewing unit that takes your home coffee experience to the next level. Made with high-quality materials and designed by coffee-masters in New Zealand, the Varia Brewer gives you the ability to brew to practically everybody's preferred method – from a smooth cold brew to a strong Italian-style stovetop. The Varia features a handful of durable parts that fit together to create a versatile brewer that not only makes delicious coffee and tea but it also looks great on your kitchen bench.

The parts of the Varia include a Dripper (02 Size), Stainless Steel Jug, Plunger, Moka Pot Coffee Chamber, and a Boiler. Also included is a lid (used when the plunger is not in use) and a base (used when the boiler is not in use). The main body of the brewer is double-walled stainless steel, and is paired with a cool-touch silicone handle for safe and easy brewing. The décor seal at the bottom of the brewer is customisable, with different colours included in the box.

Features:

- Six Brewing Functions: Filter, Cold Brew, French Press, Moka Pot, Kettle, and Tea Pot
- Boiler function can be used on gas, electric, or induction stovetops
- Customisable colour seal
- Cool-touch silicone handle
- Easy to clean: simply rinse out coffee and use a cloth to wipe out any residue after use
