

FELLOW

Meet the Mighty Prismo

Prismo is a pressure actuated valve designed to be used with the AeroPress Coffee Maker. Made by Fellow Products, Prismo allows for a build-up of pressure which creates espresso-style coffee from your AeroPress.

Prismo not only can be used to achieve a smooth espresso-style coffee, it also acts as a no-drip seal for a full immersion brew. The reusable 70 micron etched filter eliminates the need for filter papers and doesn't let any sediment pass through into your brew.

FEATURES

- Can be used for full immersion, espresso-style coffee, cold brew, hot tea, and iced tea
- Integrated Gasket which stops your brew from leaking over the sides
- Reusable 70 micron fine, stainless steel filter

SPECIFICATIONS

- Compatible only with the AeroPress Coffee Maker
- Body Material: Polypropylene
- Valve Material: Silicone
- Dimensions: 69 mm diameter x 25 mm height
