Toddy® Cold Brew System - Commercial Model

The Toddy® Cold Brew System - Commercial Model uses its unique cold-water extraction process to produce cold-brewed liquid coffee and tea extract that offers a full-bodied, aromatic flavor profile that translates into a bold, super-smooth taste. Brew 5 lbs of your favorite coffee to yield at least 2.5 gallons of extract.

The Commercial Model now comes standard with the patented Toddy® Lift, maximizing the volume of extract you get out of every batch.

Brew with Toddy's paper filters or tree free filters.

NSF Certified

Item: CMLTCM

Specs:
