## STAGG POUR OVER KETTLES

One of the most unique kettle designs on the market - the Stagg pour over kettle is a beautifully functional creation. The precision pour spout, coupled with the built-in brew-range thermometer gives you exceptional functionality. Pour at an even, slow pace with Stagg's counterbalanced handle that moves the centre of mass back towards your hand.

### Specifications:

- Compatible with gas, electric, and induction stovetops
- Stainless Steel body, BPA-free polypropylene lid
- 1 litre boiling capacity
- Available in Black, Silver, Copper, Matte White, and Graphite

*For more information or a demonstration, contact us via the details below.*

SKU: FP1102

## DESIGN FEATURES

### PRECISION POUR SPOUT

A slow and steady pour wins the race. Stagg's spout is designed for the optimal pour over flow rate.

### BREW RANGE THERMOMETER

The red range highlights optimal brew temperature between 90 and 96 degrees Celsius.

### COUNTERBALANCED HANDLE

Stagg's weighted handle shifts the centre of mass closer to your hand for an easier pour.
