

# Latte' Pro™

## Perfection in every pour.

Each Latte Pro Milk Pitcher features a recess in both sides of the pitcher with replaceable, stick-on thermometers.

This makes the Latte Pro a perfect choice for either right-handers or left-handers, enabling the barista to monitor the milk temperature from either side of the pitcher. The Latte Pro has been designed with an integrated thermometer to prevent the risk of cross-contamination between milk types and hygiene-related issues due to the use of unclean stick thermometers within the milk itself.

With a comfortable, ergonomic handle and a precise spout for latte art, the Latte Pro is a great choice for the professional or home barista.

### Features :

- Perfect for both professional and home baristas
- Great for home, office, or commercial kitchen environments
- Features an ergonomic handle for easy and comfortable pouring
- Compatible with Latte Pro silicone colour grommets for easy identification of milk types
- Large liquid crystal, stick-on thermometer for assured accuracy and temperature consistency
- No calibration required for the thermometer
- Stick-on thermometer perfect for barista training
- Thermometer helps to reduce waste by making it easier to track the milk temperature

- Stick-on thermometer reduces the risk of cross-contamination due to stick thermometers being used across milk types
- Thermometer recess on both sides of the pitcher for easily visibility while steaming for both right handed or left handed baristas
